PROFILE

As a proud father of three amazing kids, I've been attending the DigitalCrafts Web Development bootcamp for the past five months. It's been an incredible journey of learning and growth. I've had the opportunity to work on real-world projects, diving into HTML, CSS, JavaScript, ReactJS, React Redux, and Node.js. Now, I can't contain my excitement because I genuinely believe I'm ready to enter the web development industry. I've developed a strong skill set and gained hands-on experience, and I'm eager to contribute and make my mark in this field and my make kids and my family proud.

RECENT PROJECTS

1. I built this app using HTML CSS Javascript also fetching API that when you search current NBA players it generates their stats.

- https://jayy2023.github.io/My-NBA/

1. I built a movie application using the Material UI library. For managing the state of the application, I used Redux Toolkit, and for handling side effects, I used Redux Saga. I also optimized the website for mobile devices using Material UI and React. The app is deployed via Netlify.
